Address: Islamabad, G9/1

About me

I am a dedicated and detail-oriented AI and software developer with a strong foundation in Python, machine learning, and modern LLM-based technologies. Skilled in building end-to-end AI applications, I have hands-on experience with SQL, vector search, RAG pipelines, embeddings, LangChain, and LangGraph. I enjoy developing intelligent, practical solutions and thrive in environments that challenge me to think critically and solve complex problems. With a continuous learning mindset, my goal is to contribute to impactful projects that leverage AI to deliver real-world results.

Education & Training

Artificial Intelligence Training | Adan Institute of Technology | 16/08/2025 - Current | Islamabad

- Python Programming Essentials — writing clean code, using data structures, building small applications.
- SQL & Database Handling — designing tables, writing queries, integrating Python with databases.
- AI & LLM Fundamentals — understanding embeddings, transformers, and how modern AI models work.
- RAG Pipeline Skills — chunking documents, creating embeddings, vector search, and building question-answering systems.
- LangChain & LangGraph — creating RAG chains, agents, and multi-step AI workflows.

Bachelor of Science in Computer Science | Riphah International University | 01/09/2021 - 01/06/2025 | Islamabad

Final Year Project: Hair Loss Detection and Prevention System

Short Description: An advanced AI-powered solution integrating deep learning and computer vision to detect and analyze hair loss patterns. The system employs Convolutional Neural Networks (CNNs) for scalp image classification, leveraging pretrained models (ResNet50V2, DenseNet169) and custom CNN architectures for high-accuracy predictions. It utilizes data augmentation techniques to enhance model generalization and prevent overfitting. The AI model processes features such as hair density, thinning patterns, and scalp health indicators, providing users with real-time assessments and personalized recommendations based on their specific condition. The system also incorporates natural language processing (NLP) for user interactions, an AI-driven recommendation engine for dietary and lifestyle modifications, and a reinforcement learning module for continuous improvement based on user feedback. Additionally, it integrates a community-driven support system and a geo-based dermatologist referral network, ensuring a comprehensive AI-enhanced approach to proactive hair care management.

Intermediate in Pre Engineering | The East School and College | 01/04/2019 - 01/04/2021 | Nowshera, KPK

Major Subjects: Mathematics, Physics, Chemistry

Completed Intermediate in Pre-Engineering with a strong foundation in Mathematics.

Developed analytical and problem-solving skills, preparing for advanced studies in engineering and technology

Matric in Science | The East School and College | 01/04/2017 - 01/04/2019 | Nowshera, KPK

Language Skills

- **Pashto** (Mother tongue)
- **Urdu** (Fluent - national language)
- **English** (Proficient – able to communicate effectively in writing and speaking)

Skills

Python-Programming | Flutter | Microsoft Office Proficiency | good HTML, CSS, JS, JQuery, Bootstrap skills |
Firebase: Firestore, FirebaseAuth, Firestorage, RealTime database

Generative AI & Agentic AI (Beginner)

RAG | LangGraph | LangChain | Microsoft Azure | Azure AI Foundry | n8n

Projects

Tomato Leaf Disease Classification using CNN | 23/09/2024 - 20/12/2024

Utilized Convolutional Neural Networks (CNNs) in Python to develop a classification system for tomato leaf diseases.

Achieved 95% accuracy using models like ResNet, VGG, and MobileNet on the PlantVillage dataset.

Small Projects Through Out Degree

(GitHub)

- Snake game using python (Turtle)
- Pong game using python (Turtle)
- US states game using python (Turtle, pandas)
- Road crossing turtle using python (Turtle)
- Cash and Carry using Java

Certifications

- Python for Everybody
- Hands-on Introduction to Linux Commands and Shell
- Operating Systems and You: Becoming a Power User
- Command Line Basics in Linux
- The Bash Shell and Basic Scripting in Linux
- Participated in the 100-days of Python Boot camp
- Supervised Machine Learning: Regression and Classification
